

Home First Gross Annual Compliance Income Calculation Guidance

What You Need to Know:

- Document your calculations so NH Housing staff can understand how you arrived at the Gross Annual Compliance Income.
- Each loan file will have two income calculations:
 - For **qualifying income**, follow industry standard documentation and calculation requirements.
 - For Home First **Gross Annual Compliance Income**, provide documents dated within four months of the closing date to support your compliance calculations. Within those four months, use the most recent information available.

Questions?

- Have your underwriter contact the underwriting team at underwriters@nhhfa.org.
-

Include Gross Annual Compliance Income from the following people:

- A person who will have title to the property and will sign the mortgage. (i.e., a borrower)
- A person expected both to live in the residence being financed and to sign the mortgage note (i.e., an occupant co-signer) or be on title.
- A non-occupant that is both a borrower and on title.

Include the following income type(s) and use the Gross Annual Compliance Income calculation worksheet to show your calculations, per guidance reflected in charts:

Calculating Gross Annual Compliance Income: When calculating Program Eligibility Compliance Income, there are **two** types of income to consider – gross **income from an employer** and **income from all other sources**. Include all income unless specifically listed as excluded on this reference guide. Generally, income which is reasonably anticipated or expected to be received, must be included in the annual calculation.

SECTION 1 - Calculating Income from an Employer: Determine whether the borrower receives base pay only or a combination of **base pay** and **additional income from an employer**. Ask the employer for clarification if the Borrower has not been on the job long enough to establish a history.

Calculate Base Pay from an Employer

Calculate Base Pay from an Employer	
Definition/Inclusions	Exclusions
<p><u>Regular Hours/Pay:</u> Borrower is scheduled for the same number of hours per pay period. Gross salary or wage income from part-time, full-time, or seasonal work with regular hours/pay.</p> <p><u>Irregular Hours/Pay:</u> Variable hours, seasonal work, etc., such as nursing, restaurant, construction, retail, or part-time work with varied hours or pay.</p>	<ul style="list-style-type: none"> Income no longer available Income not yet earned (i.e., expected raise)
Guidance	
<ul style="list-style-type: none"> Determine whether base pay is regular hours/pay or irregular hours/pay and follow the calculation instructions on the following pages. Borrowers cannot manipulate income (quit job, etc.) to become eligible. If new employment is secured before closing on a loan, income documentation or a regular paystub will be needed to confirm income. If the borrower has a history of receiving a bonus and the written VOE supports the bonus is likely to continue, include a 2-year average. If the borrower had income in the 4 months prior to closing and is currently looking for employment, include a 2-year average income (or available timeframe). Include all income, including sick, holiday and vacation pay. All income documentation is required and could include, but is not limited to paystubs, VOE, tax returns, W-2's, etc. Seasonal work requires the same documentation as "Base Pay from an Employer, irregular hours/pay," but should also include any unemployment benefits, if applicable 1099s, tax returns, and/or verification from unemployment office to verify unemployment benefits. 	

Regular Hours/Pay

1. Determine frequency of income - weekly, bi-weekly, semi-monthly, etc.
2. Identify documentation needed to support payment frequency and calculation.
3. Apply Calculation - (Base Wage x Hours Worked in a Pay Period) x (# of Pay Periods Per Year)
4. This should approximate the annualized YTD on VOE or paystubs. If not, check for additional pay, such as overtime, bonus, shift differential, etc. (Employers don't always break this out on the VOE).
5. Don't double count by adding sick, vacation, and holiday earnings.
6. See "**Calculate Additional Pay from an Employer**"

Hourly pay	Bi-weekly pay	Semi-Monthly pay
Multiply the pay per hour by the number of hours worked per week. Multiply total by 52 weeks a year.	Multiply the bi-weekly pay by 26.	Multiply the semi-monthly pay by 24.
Example: 1. \$15 per hour x 40 hours a week = \$600 2. \$600 x 52 weeks a year = \$31,200 3. \$31,200/12 = \$2,600 gross monthly base pay	Example: 1. \$1,200 every two weeks x 26 pay periods a year = \$31,200 2. \$31,200/12 months = \$2,600 gross monthly base pay	Example: 1. \$1,300 semi-monthly pay x 24 pay periods a year = \$31,200 2. \$31,200/12 months = \$2,600 gross monthly base pay

Irregular Hours/Pay

1. Use YTD Earnings total. If using a different timeframe, the underwriter should provide documentation and an explanation to support using a different timeframe.
2. To annualize, divide the resulting amount by the number of months and days worked, and then multiply that number by 12 months to get total average pay from an employer.

Calculate Additional Pay from an Employer

Additional Income from an Employer	
Definition/Inclusions	Exclusions
Income over and above base pay, such as overtime, shift differential, bonuses, profit-sharing, tips, commissions, incentives (opt-out health insurance) etc. Income is counted regardless of the currency in which it is paid (i.e., U.S. Dollars or virtual currency).	One-time (non-recurring) income; i.e., income received once that does not have a history and is unlikely to reoccur in the future, employer provides written notice additional pay is ending.
Guidance	
<ul style="list-style-type: none"> • Documentation of additional pay could include, but is not limited to, paystubs, VOE, etc. • Always use YTD for overtime (unless employer and income history verify OT was for one-time, special project, etc.), commissions, bonuses, shift differentials, and sick/vacation/holiday pay (if not already included in base pay). If using a different timeframe, the underwriter should provide documentation and an explanation to support using a different timeframe. • Include all income that is included in the YTD Earnings Total on a paystub or on a VOE. Virtual currency as compensation for services: Calculate as you would with other income, with frequency documented. For such calculations, use the fair market value of the virtual currency on the date received. Virtual currency documentation may include but is not limited to printouts or screenshots of virtual wallets, ledgers, receipts, etc. Virtual currency income from an employer is included in "Wages, tips, other compensation" reported on Form W-2. 	

1. Review the earnings section of paystub or VOE and add up all additional income that is included in the YTD earning total and not included in base pay. (Sick, vacation, holiday (unless considered OT), etc. are generally included in base pay).
2. Add YTD additional pay total, if available on a VOE. If using a different timeframe, the underwriter should provide documentation and an explanation to support using a different timeframe.
3. To annualize, divide the resulting amount by the number of months and days worked, and then multiply that amount by 12 months to get an average of Additional Pay from an Employer.

SECTION 2 - Calculating Income from Other Sources: Determine if there are other sources of income, apart from wages from an employer.
